

MARÍA BELÉN CORVALÁN AMIL

Senior Frontend Engineer | React | Angular | TypeScript | Design Systems

Buenos Aires, Argentina | Remote | bcorvalan.amil@gmail.com | linkedin.com/in/mbcorvalan

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8+ years of experience building scalable, accessible, and high-performance web applications for global organizations and enterprise clients. Strong expertise in React.js, Angular, TypeScript, JavaScript, component architecture, enterprise design systems, Adobe Experience Manager (AEM), e-commerce platforms, accessibility (WCAG), automated testing, analytics, performance optimization, and CI/CD. Experienced in integrating frontend applications with REST APIs, CMS platforms, authentication flows, backend services, and third-party systems. Applies generative AI and AI-assisted engineering throughout the software development lifecycle to accelerate code analysis, component audits, technical documentation, test generation, migration assessments, and repetitive workflow automation.

TECHNICAL SKILLS

Frontend	React.js, Angular, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass, Storybook.js
Architecture	Design Systems, Component Libraries, Micro Frontends, Reusable UI Architecture, Design Tokens, Responsive Design
Backend & Integration	Node.js fundamentals, REST APIs, JSON, CMS architecture, Adobe Experience Manager (AEM), authentication flows, third-party integrations
Quality	Unit Testing, Regression Testing, Smoke Testing, Test Automation, Code Reviews, Accessibility Testing, WCAG
AI & Automation	Generative AI, AI-assisted Development, Prompt Engineering, Automated Documentation, Code Analysis, Test Generation, Workflow Automation
Delivery & Analytics	Git, CI/CD, Agile/Scrum, Performance Optimization, Google Analytics, Jira, Figma

PROFESSIONAL EXPERIENCE

Senior Frontend Developer - Hexaware

Aug 2024 - Present | Full-time | Remote

- Contribute to the development and evolution of EY Motif, an enterprise-grade design system used across multiple EY products and business areas.
- Design, develop, test, document, and maintain scalable, accessible UI components using React, Angular, TypeScript, JavaScript, Storybook, and modern component-development practices.
- Translate complex Figma specifications, design tokens, interaction states, and accessibility requirements into production-ready reusable components.
- Participate in the full component lifecycle: technical analysis, API definition, implementation, unit testing, accessibility validation, documentation, code review, release preparation, and maintenance.
- Analyze React components and Web Components to identify differences in APIs, properties, events, slots, internal structure, dependencies, and migration requirements.
- Collaborate with product owners, designers, project managers, backend engineers, QA specialists, technical leads, and stakeholders to define reusable solutions for enterprise applications.
- Apply generative AI and AI-assisted tools to automate component comparisons, code analysis, technical documentation, repetitive development tasks, migration audits, and test-generation workflows.
- Improve delivery reliability through CI/CD practices, performance optimization, dependency management, coding standards, and maintainable versioned releases.

Senior Frontend Developer - Hero Digital

Sep 2021 - Aug 2024 | Full-time | Remote

- Delivered large-scale digital experiences for enterprise clients across e-commerce, healthcare, technology, telecommunications, and real estate, including Zoom, Jefferson Health, and K. Hovnanian Homes.
- Built responsive, accessible, and reusable interfaces primarily with React.js, JavaScript, TypeScript, HTML, CSS, Sass, Storybook, and Adobe Experience Manager (AEM).
- Developed and integrated AEM components that enabled content authors and business teams to manage dynamic, content-rich experiences through reusable CMS modules.
- Implemented e-commerce and content-driven features including product information, navigation systems, search experiences, forms, landing pages, templates, and complex responsive layouts.
- Integrated frontend applications with REST APIs, CMS content, analytics services, third-party libraries, and backend-provided data; collaborated with backend teams on API contracts and data requirements.
- Implemented and maintained Google Analytics tracking to support measurement of user behavior, campaign performance, conversions, and digital engagement.
- Applied accessibility, semantic HTML, responsive design, performance optimization, component reuse, and cross-browser compatibility across high-traffic enterprise platforms.
- Participated in the complete delivery lifecycle: requirements analysis, estimation, architecture discussions, implementation, code review, testing, deployment, and production support.

Frontend Developer - TradeHelm, Inc.

Mar 2020 - Aug 2021 | Full-time | Remote

- Developed responsive, cross-browser web applications using React, Angular, JavaScript, HTML, CSS, Sass, and component-based frontend architecture.
- Transformed Figma and UX specifications into accurate, reusable, and maintainable interfaces for content-rich digital platforms.
- Integrated frontend applications with multiple CMS solutions, REST APIs, backend services, and third-party systems to render dynamic content and support configurable experiences.
- Collaborated with backend engineers to understand endpoint behavior, request and response structures, validation rules, error states, and frontend data transformations.
- Created reusable components and shared interface patterns that improved consistency, reduced duplicated code, and accelerated implementation of new features.
- Maintained software quality through unit testing, functional validation, code reviews, browser testing, iterative delivery, and close collaboration with QA teams.

Frontend Developer - Cencosud S.A.

Mar 2018 - Mar 2020 | Full-time | On-site

- Contributed to the redesign and frontend development of the Easy Argentina e-commerce platform, part of one of the largest home-improvement retail operations in Latin America.
- Worked on a complex product catalog comparable in scope to a major international home-improvement retailer, requiring detailed understanding of product taxonomy, business rules, customer journeys, and commercial priorities.
- Analyzed and resolved usability and technical issues affecting product discovery, information hierarchy, category navigation, filters, product pages, and responsive behavior.
- Developed React-based interfaces to modernize the e-commerce experience and establish a more scalable, consistent, and maintainable frontend codebase.
- Collaborated with product, UX/UI, business, marketing, backend, and QA teams to translate complex retail requirements into clear and usable digital solutions.
- Integrated product data, catalog services, pricing information, inventory-related content, and backend-provided services into responsive customer-facing interfaces.

Software Quality Assurance Analyst - MRM

Feb 2016 - Mar 2018 | Full-time | On-site

- Performed end-to-end quality assurance for web applications using manual testing, regression testing, smoke testing, functional validation, and automated-testing practices.
- Tested user interfaces, business flows, responsive layouts, browser compatibility, content behavior, and integrations to identify defects before production releases.
- Created detailed defect reports and partnered with developers, designers, project managers, and business stakeholders to reproduce issues and validate solutions.
- Developed a quality-oriented engineering mindset that informs current frontend work, including component testing, accessibility validation, edge-case analysis, and maintainable implementation.

EDUCATION

Graphic Design - Universidad de Palermo

2013 - 2018 | Buenos Aires, Argentina
